PROFESSIONAL SUMMARY

Results-driven Software Engineer with 2+ years of experience building full-stack web applications using Laravel (PHP) and React. Proven track record delivering payment integrations (MPesa, Stripe, PayPal), RESTful APIs, and multi-tenant SaaS systems in fast-paced Kenyan tech environments. Currently pursuing an MSc in Artificial Intelligence, bringing emerging expertise in AI-driven workflow automation. Passionate about writing clean, scalable code that solves real business problems.

TECHNICAL SKILLS

Languages: PHP, JavaScript (TypeScript), SQL, Python

Frameworks & Libraries: Laravel, React, Chart.js

Databases: MySQL

DevOps & Tools: Docker, Linux, Git, GitHub

APIs & Integrations: RESTful APIs, MPesa, Stripe, PayPal, Laravel Sanctum

Architecture: Multi-tenancy, Role-Based Access Control (RBAC), Microservices

Other: Prompt Engineering, UI/UX Principles, Agile/Iterative Development

WORK EXPERIENCE

IT Officer | Digital Literacy Programme | Kenya

Nov 2025 – Present

- Delivered structured training on laptop and tablet use to teachers and students in public schools.
- Developed training materials and led hands-on sessions, strengthening technical communication and leadership skills.

AI Training Data Specialist | Bogner & Partners | Nairobi, Kenya

Aug 2025 – Sep 2025

- Designed and implemented AI-driven workflows to automate website generation, reducing manual build time significantly.
- Applied prompt engineering best practices to optimize LLM outputs for production-ready web content.
- Translated client requirements into iterative architecture decisions, balancing performance and UX.

Junior Software Developer | Vasmobile Fintelco | Nairobi, Kenya

Jan 2025 – Jun 2025

- Built and maintained full-stack applications using Laravel and React to digitize fee collection across multiple institutions.
- Integrated MPesa, Stripe, and PayPal payment gateways, enabling seamless real-time transactions.
- Automated invoicing pipelines and developed financial reporting dashboards for management use.
- Implemented multi-tenant architecture to support multiple client organizations on a single codebase.
- Managed Linux-based server environments and containerized services using Docker.

Software Developer Intern | Shiva Software Africa | Nairobi, Kenya

Oct 2024 – Dec 2024

- Implemented Role-Based Access Control (RBAC) for an HR and car wash management system using Laravel Sanctum.
- Developed payroll computation engine handling tax deductions, bonuses, overtime, and MPesa disbursements.
- Built employee performance analytics and financial reporting dashboards using Chart.js and Laravel Excel.
- Designed a calendar-based appointment scheduling system with real-time slot availability for car wash bookings.
- Automated shift scheduling and leave management workflows, reducing HR administrative overhead.

EDUCATION

MSc Artificial Intelligence (In Progress)

Sept 2025 – Present

Deepening expertise in machine learning, neural networks, and AI systems design.

Cisco Certified Network Associate (CCNA)

May 2021 – Aug 2021

Network configuration, troubleshooting, VLANs, IP addressing, security, and automation.

BSc Applied Computing – Software Development

Sep 2020 – Dec 2024

Focused on secure API design, distributed systems, data structures, and algorithms.

- Coursework: Full-Stack Development, Data Structures & Algorithms, Networking (OSI, TCP/IP, IPv6), Programming.
- Capstone Project: Animal Feeds Management System, end-to-end inventory and supply chain web application.

PROJECTS

Fee Collection & Invoicing Platform

- Full-stack Laravel + React SaaS application for schools to manage student fees, generate invoices, and track payments with MPesa integration.

HR & Payroll Management System

- Multi-module HR system with payroll engine, RBAC, employee analytics, and M-Pesa-based salary disbursement built in Laravel and React (TypeScript).

Car Wash Booking & Operations Platform

- Real-time calendar-based booking system with revenue analytics, shift scheduling, and online payment support.
